Rubber end caps should be used on all Casing pipe ends (House connection, Socket connection, T pieces, Bends, ....)

FLEXALEN 1000+ Multiple line- and FLEXALEN 600 - rubber end caps have 1, 2 or max. 4 reduced exits for carrier pipes (Fig.2). Cut the reductions along the groove according to the required pipe size and quantity of pipes with a knife or a pair of scissors. (Fig.2)

Remove surplus material between the corrugations of the casing pipe to achieve 100% seal effect.

Clean the Sealing lips and Casing pipe!

Apply the rubber end caps at first on the PB carrier pipe(s).

Use only water as lubricant.

Sealing lip has to be completely in the corrugation of the casing pipe.

Mount cable ties onto casing pipe and carrier pipe.
