INSTALLATION INSTRUCTION
INSULATION SOCKET

Type:
FV-UM40PO
FV-UM63-50PO
1) Slide sliding muff and heat shrink sleeves onto pipe ends.

2) Apply Rubber end caps onto pipe ends.

3) Do the welding.

4) Rubber end caps: Tie all cable ties on Carrier pipe(s) and Casing pipe.

5) Fit length of insulation and wrap around the carrier pipe(s).

6) Fix with cable ties.

7) Clean casing pipes at the pipe ends.

8) Slide sliding muff over the connection.

9) Position both heat shrink sleeves between casing pipe and sliding muff but clean first the sliding muff in this area, remove protective foil and packing.

10) Warm up heat shrink sleeves continuously with a soft, yellow flame.

!!!! Be careful when warming up corrugated casing pipes in order to avoid damages!!!!
