Maximizing the use of renewables and minimizing the waste of energy

Our commitment

Carbon-neutral in our operations by 2030

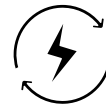

Solutions for Global Challenges

Energy efficiency

Extending durability

Renewable energies

Acoustic comfort

Lightweighting

Urbanisation

Our Products

We produce all our products in a sustainable manner and only offer products that: are recyclable, are produced in an environmentally friendly way, are produced by suppliers that share our principles, consist of safe materials, and minimize energy waste.

By conducting Life Cycle Assessments, we obtain and publish certified Environmental Product Declarations (EPDs) for our products to enable sustainable decision-making for our customers.

We produce certified Cradle-to-Cradle products, the world's most ambitious and actionable standard for designing and making products that enable a healthy, equitable, and sustainable future

Our World

- Thermaflex Factory
- Thermaflex Sales Office

We serve customers in 40+ countries.

We have production facilities across the world, which allows us to be close to our customers and to be able to produce and deliver locally.
